About This Software

Between 2007 and 2013 there were more than 28,000 reported cases of unruly passenger incidents. Air Rage is a 90 second Virtual Reality piece that illustrates how changes to air travel may have led to increased aggression among passengers.

I went through an entire day/night cycle and thought it was good. You can't really navigate or explore, but the setting is nice looking and peaceful. The soundtrack is ambient and not distracting (good thing) and it was great to relax.

It's not perfect though, there's some choppiness at the tips of the mountains when moving your head. Additionally, it would be nice to be able to control the day/night cycle, turn off the words and navigate a bit.

I'm glad I bought it.. Very basic, but is thus easy to figure out how to create an overlay.

Not many overlays in the workshop, and most of them are kids messing about, so you will be creating your own one soon anyway. It has it's moments of pain, but once you have a "theme" saved, it just carries on working.. This game is a good way to waste a little (or in my case a lot of) time. It has a lot of sad, funny, moments and will have you playing multiple times to see all the different endings. Pixel Art: 5/5 (Very creative and artistic)

Immersion: 4/5 (I just love this world)

Gameplay: 5/5 (Every moment of frustration is so enjoyable!)

Controls: 4/5 (Precise and complex)

Value: 5/5 (Lots of game play for the price)

Difficulty: 5/5 (Can be really tough, especially 100%)

Overall 4.6 (Difficulty is always excluded)

[Please follow my Pixel Art Curation for other great games...](#)

WOW!

I love saying that, but don't too often...This game is a must have for pixel and platformer lovers alike!

I am still trying to wrap my head around this game and all the while I am just sucked right in!

The pixel art is so simple, yet has so much creativity and depth! Very imaginative!

At first I thought this was going to be a really cheap, cheesy and crap game...Boy, was I so very wrong!

It is simplistic in the truest form of graphic design, yet its aesthetic is remarkably beautiful.

The game concept is simple, move from A to B in a small game field while jumping, sliding, dashing, morphing, etc. The game play is therefore, so very complex because of the various controls and obstacles!

If you are a platformer, you should play this game!

ACHIEVEMENTS: Lots and lots...Tough game, so 100% will be an investment of time and frustration.. >Buy TE2 1 year ago

>Don't have anybody to play with

>Get from Steam 75% discount for TE2

Thanks steam. Love it. i enjoy little puzzle and strategy games like this. i find it relaxing to just listen to music or even some youtube vids as background noise while playing this game.. This game was amazing. It just needs to be optimized. Going for the

0 damage achievement will give you a brain tumor from the lack of frames. ;-; it took me so long to get it.. Needs more people playing.

i get motion sickness but its a huge rush i love it thanks for mking this .. Imagine a huge generic autogenerated map, which is the same every mission except few (then it's smaller, but not that different).. which you can run, run, run.. occasionally killing some animal.. eating food.. repeat..

Fun? Nope...

Survival from boredom simulator.. I didn't survive.. A solid visual novel with well designed characters, an interesting premise and a fantastic sound track. I had not played too far, but I expect it to be a good story.

A bit problem: you can play all 4 chapters right from beginning, so I am affraid of "spoilers".

And another one: where is the sound tracks.

IWANTITRIGHTNOW!. amazing game love it absolutely good fun me likey if you leik horror gaem you like dis game i promise or gay. pretty good game. Really like this game. It's definitely a zen game where you turn off your brain and just slowly build your village. My main complaints would be the lack of a fast forward button. It seems like you can only pause the game. Even when you change windows screens the game just pauses which sucks because it doesn't take that much management for the village. I also wish you could set your own character on autopilot instead of having to repeatedly click on a new task.

As I wrote though, this is a zen game. Just turn your brain off and relax.. I was disappointed at the game itself. Wish the designers would have put more time and thought into it. :V
